ACAS Guidance Managing the Gender Pay Gap calculated the pay scales for all teaching staff that are aligned to the School Teachers' Pay and Conditions document which is reviewed on an annual basis. For support we use the pay scales set by the National Joint Council for Local Government Services. Staff move through pay scales grade based on a thorough and robust appraisal process, meaning earnings are based on performance outcomes, irrespective of their gender.

Although equal pay and gender pay gap look at differences between men's and women's pay, they are two different issues and this needs to be remembered when reading this report. Equal pay is the right for men and women to be paid the same when doing the same or equivalent work. This is a legal requirement that we are committed to upholding at TTE. Gender pay gap is a measure of the difference between men's and women's average earnings across an organisation. All roles across the organisation are included in calculating the average earnings figure and it is expressed as a percentage of men's earnings.

We take the issues of diversity and gender extremely seriously and I look forward to working with our employees as we continue to strive towards an ever more inclusive organisation.

Carolyn Robson, Chief Executive Officer
